ADVANCE SOUND COMPANY NEWSLETTER

Hello Trusted Partner,

Welcome to the Advance Sound Company November Newsletter!

For over 55 years, Advance Sound Company has been a trusted partner in designing, installing, and supporting audiovisual systems for schools, municipalities, cultural institutions, and commercial clients. This newsletter will share updates on our latest projects, company news, and helpful information on how to connect with our team as we continue to evolve with today's technology.

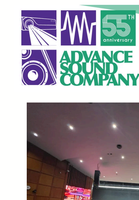

Thank you,
The Advance Sound Company Team

South Huntington TV Studio

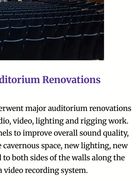

Oyster Bay High School Gym

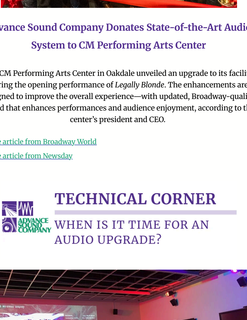

Cold Spring Harbor Orchestra Room

Locust Valley High School Cafeteria

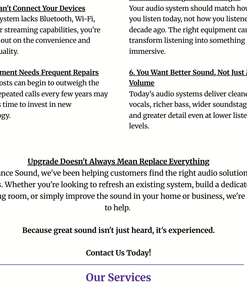

LATEST NEWS

Huntington High School Auditorium Renovations

In August 2026, Huntington High School underwent major auditorium renovations where Advance Sound Company handled audio, video, lighting and rigging work. The work involves installation of colorful panels to improve overall sound quality, an entirely new audio system throughout the cavernous space, new lighting, new stage rigging, two huge video panels affixed to both sides of the walls along the front of the stage, installation of a video recording system.

TECHNICAL CORNER

WHEN IS IT TIME FOR AN AUDIO UPGRADE?

If your sound system is more than 10 years old, it may be holding you back from better performance, greater reliability, and features that make every day listening more enjoyable.

Here are a few signs that it may be time for an upgrade:

1. Your System Doesn't Sound Same
Crackling speakers, distorted sound, or uneven volume are often signs that components are wearing out.

2. You Can't Connect Your Devices
If your system lacks Bluetooth, Wi-Fi, HDMI, or streaming capabilities, you're missing out on the convenience and sound quality.

3. Equipment Needs Frequent Repairs
Repair costs can begin to outweigh the value. Repeated calls every few years may mean its time to invest in new technology.

4. You're Expanding or Remodeling
Modern systems can provide speakers that blend beautifully into any space.

5. Your Listening Habits Changed
Your audio system should match how you listen today, not how you listened a decade ago. The right equipment can transform listening into something immersive.

6. You Want Better Sound. Not Just More Volume
Today's audio systems deliver cleaner vocals, richer bass, wider soundstage, and greater detail even at lower listening levels.

Upgrade Doesn't Always Mean Replace Everything
At Advance Sound, we've been helping customers find the right audio solutions for years. Whether you're looking to refresh an existing system, build a dedicated listening room, or simply improve the sound in your home or business, we're here to help.

Because great sound isn't just heard, it's experienced.
